SIMPLE SYLLABUS + BRIGHTSPACE

Integrated experience makes syllabus creation easy.

Downloading syllabus templates, copying and pasting content, uploading to Brightspace—sound familiar? Publishing syllabi has become a laborious process on some campuses that rely on manual operations for creating and tracking syllabi. Fortunately, it doesn’t have to be this way. That’s why Simple Syllabus and D2L have teamed up to make comprehensive, integrated syllabi within Brightspace a reality.

THE SOLUTION IS SIMPLE

Simple Syllabus helps instructors save time and eliminate redundant tasks associated with syllabus creation. It is centralized and template-driven, automatically ensuring compliance with accreditation and regulatory standards while still giving faculty the academic freedom to personalize curriculum content for their classroom directly within Brightspace. Designed specifically for updating syllabi, it is incredibly intuitive and requires no training to use. Its web-based architecture means it’s accessible from anywhere, any time and requires no software installation or updates. The powerful publisher of Simple Syllabus helps instructors create more interactive syllabi by including rich media, such as video or images, directly within Brightspace. All changes made to your syllabus are automatically saved without any need to push a button. Content previously created by instructors automatically carries forward each term in the syllabus publisher, eliminating the need for tedious copy and paste.

Retrieval of your institution’s syllabi for compliance purposes is even easier. Simple Syllabus is built on a centralized syllabus repository that archives all campus syllabi created within Brightspace and their underlying data to support extensive reporting capabilities, for accreditation and effective syllabus management.
