WHY SYLLABUS MANAGEMENT?
THE PROOF IS IN THE NUMBERS

ACCREDITATION READY
A deliverable needed for almost all major accrediting bodies, syllabi are notoriously difficult to track and maintain. According to our recent higher education community study, one in three administrators report difficulty retrieving syllabi for accreditation.

Students ranked syllabi the most important resource for academic information at a rate of two-to-one to the next closest tool, the website.

30% of all syllabi fail to include critical course learning objectives, grading scales or assignments.

94% of students want to access a syllabus prior to registration, yet only 55% of syllabi reach students before the first day of class.

More than half of schools report problems with the consistency of their syllabi across campus.

Only 16% of syllabi are mobile optimized, but 91% of students want access through a mobile device.

70% of students report receiving class syllabi that are missing key content.

84% of institutions report having dealt with a student dispute involving content within the syllabus.

One in three schools haven’t tested their syllabi for compliance with accessibility standards.

87% of students access syllabi regularly throughout the semester.

Lack a process?
More than half of your faculty will likely say that updating their syllabus is time consuming and difficult.
