Faculty and instructors are using Class to track student engagement, facilitate group discussion, monitor participation, and more - all on Zoom.

1. An intuitive user interface designed to see all students and course data at once.
2. A dynamic set of teaching and learning tools built to be deployed during class.
3. Easily launch live assignments, quizzes, and exams; review and grade in real-time.
4. Course management tools help instructors run the course and track learner progress.
5. Instructors and TAs can talk with students privately with one-on-one discussions.
6. New seating charts make it easier for instructors to run and manage their class.
7. Automatically compare class roster to present students to quickly take attendance.

And more...

- ID Verification
- Proctored Assignments & Exams
- Participation Tracking
- Lose Focus Tracking
- Virtual Desk View
- Gradebook
- Class Dashboard
